Docket No.: PF-0187-2 RCE

IN THE CLAIMS

Please replace claim 1 with the following amended version. For the Examiner's convenience, all pending claims are listed below.

- 1. **(Four Times Amended)** An isolated antibody which specifically binds to a polypeptide selected from the group consisting of:
 - a) a polypeptide comprising the amino acid sequence of SEQ ID NO:1, SEQ ID NO:3,
 SEQ ID NO:5, or SEQ ID NO:7,
 - b) a polypeptide comprising a naturally-occurring amino acid sequence at least 90% identical to the full length of the sequence of SEQ ID NO:1, SEQ ID NO:3, SEQ ID NO:5, or SEQ ID NO:7, wherein said naturally-occurring amino acid sequence supports NADH dehydrogenase activity, and
 - c) an immunogenic fragment of a polypeptide consisting of at least 10 contiguous amino acid residues of an amino acid sequence selected from the group consisting of SEQ ID NO:1, SEQ ID NO:3, SEQ ID NO:5, or SEQ ID NO:7.
- 2. (As Once Amended) A composition comprising the antibody of claim 1 in conjunction with a suitable pharmaceutical carrier.
- 3. (As Once Amended) A method of preparing a polyclonal antibody with the specificity of the antibody of claim 1 comprising:
 - a) immunizing an animal with the polypeptide of SEQ ID NO:1, SEQ ID NO:3, SEQ ID NO:5, or SEQ ID NO:7, or an antigenically-effective fragment thereof under conditions to elicit an antibody response; and
 - b) screening for antibodies with the polypeptide thereby identifying a polyclonal antibody which binds specifically to the polypeptide of SEQ ID NO:1, SEQ ID NO:3, SEQ ID NO:5, or SEQ ID NO:7.

4. An antibody produced by a method of claim 3.

5. **(As Once Amended)** A composition comprising the antibody of claim 4 in conjunction with a suitable pharmaceutical carrier.

6. (As Twice Amended) A method of making a monoclonal antibody with the specificity of the antibody of claim 1 comprising:

- using the polypeptide of SEQ ID NO:1, SEQ ID NO:3, SEQ ID NO:5, or SEQ ID NO:7, or an antigenically-effective fragment thereof, to make antibody-producing hybridoma cells; and
- b) screening for antibodies with the polypeptide, thereby identifying a monoclonal antibody which binds specifically to the polypeptide of SEQ ID NO:1, SEQ ID NO:3, SEQ ID NO:5, or SEQ ID NO:7.
- 7. A monoclonal antibody produced by a method of claim 6.
- 8. (As Once Amended) A composition comprising the antibody of claim 7 in conjunction with a suitable pharmaceutical carrier.
 - 9. The antibody of claim 1, wherein the antibody is:
 - (a) a chimeric antibody;
 - (b) a single chain antibody;
 - (c) a Fab fragment; or
 - (d) a F(ab')₂ fragment.
- 10. The antibody of claim 1, wherein the antibody is produced by screening a Fab expression library.

Docket No.: PF-0187-2 RCE

- 11. The antibody of claim 1, wherein the antibody is produced by screening a recombinant immunoglobulin library.
- 12. A method for detecting polypeptide of SEQ ID NO:1, SEQ ID NO:3, SEQ ID NO:5, or SEQ ID NO:7 in a sample comprising the steps of:
 - a) combining the antibody of claim 1 with a sample under conditions to allow specific binding; and
 - b) detecting specific binding, wherein specific binding indicates the presence of polypeptide of SEQ ID NO:1, SEQ ID NO:3, SEQ ID NO:5, or SEQ ID NO:7 in the sample.
- 13. A method of using an antibody to purify polypeptide of SEQ ID NO:1, SEQ ID NO:3, SEQ ID NO:5, or SEQ ID NO:7 from a sample, the method comprising:
 - a) combining the antibody of claim 1 with a sample under conditions to allow specific binding; and
 - b) separating the antibody from the protein, thereby obtaining purified polypeptide of SEQ ID NO:1, SEQ ID NO:3, SEQ ID NO:5, or SEQ ID NO:7.
